

Main token \$house

1 million max supply distributed through farming during a period of 3 years

2 nft games :

1 race game HQ like asphalt with 3 leagues , karting, sports car, formula one, corresponding to 3 different levels of NFTs (with different scarcity.) each car should be an nft,

1 gangster game in HQ where the assets are nfts as well (guns cars etc) it should be online and multiplayer

The nfts will be auctioned on the nft market place. The customers will be able to buy or sell each of these nft in the nft market place. The market place will be powered by our token \$house. We will have a 5% fees on the transactions on the nft market place with 2.5 % coming to the dev wallet and 2.5 per cent going to buy back and burn the token.

Nfts will have a weigh value in \$house and will then be able to be stacked on the nft staking program that we will have on the platform as well.

The casino will Be composed of table games and a slot game to begin (all of this powered by smart contract)

We will be able to gamble with BNB or \$house token. Half of the winnings will be used to buy back and burn the token and the other half will be sent to dev wallet

Thé farming and staking will have a 4% deposit fee, half of which will come to dev wallet and the other half will come to dev wallet. However the farms pairs involving \$house token will not have any deposit fee.
